Recomendation:
- **Code Standars:**
  Name of variables and html files in english

```
31 lines (28 sloc)   899 Bytes
    1   <!DOCTYPE html>
    2   <html lang="en">
    3   <head>
    4
    5       <title>Document</title>
    6   </head>
    7   <body>
    8       <table width="1000">
    9           <th>
   10               <center><table width="1200">
   11                   <tr>
   12                       <td colspan="2"><img src="img/logop.png" width="170" height="50"></td>
   13                       <td><p><a href="area.html"   target="iframe2">INICIO</a></p>
   14                       <td><p><a href="inicio.html"   target="iframe2">NOSOTROS</a></p>
   15                       <td><p><a href="contactos.html"   target="iframe2">CONTACTOS</a></p></td>
   16                   </tr>
   17               </table></center>
   18           </th>
   19           <th>
   20
   21               <center><table>
   22                   <tr>
   23                       <td><p><a href="login.html"   target="iframe2">Ingresar</a></p>
   24                   </tr>
   25
   26               </table></center>
   27           </th>
   28       </table>
   29       <hr size="4" style="background-color:#000000;">
   30   </body>
   31   </html>
```

Good identation, but bad names of variable

Any documents have to be indented

```
<!DOCTYPE html>
<html lang="en">
<head>
    <title>Document</title>
</head>
<body style="background-color:rgb(231, 231, 231)";>
```

- **Visual Design:**
  Create the visual design

- **Execution:**
  Create two forms more
  Refactor the form for create Query_String correctly

```html
            <td colspan="2"> <center> <button> <a href="inicio.html"> Ingresar </a> </button> </center
        </tr>
        <tr>
            <td colspan="2"> <center> <b>
                ¿No tienes Cuenta?      
                <button> <a href="createAccount.html"> Registrate </a></button>
            </b> </center> </td>
        </tr>
    </table></center>
</form>
```

Create input no a button
